

Ericsson Cradlepoint R980

2025 - 03 - 21

The Ericsson Cradlepoint R980 is a ruggedized, secure appliance and router that broadens access to the increased speed and performance of 5G to support advanced applications and critical communications. Designed for the 5G future, it is 5G network slicing ready with the deployment flexibility of eSIMs which allow carrier switching without changing physical SIMs. (eSIM will be functional with future NetCloud releases.) It is a ruggedized 5G networking platform able to withstand wide temperature extremes, harsh environments, and hazardous locations while delivering enterprise-class standards of reliability, scalability, comprehensive management, and security. The R980 is available with either Mobile or Ruggedized IoT NetCloud service plans, providing features optimized for the needs of the differing deployments. The R980 also supports NetCloud Exchange and SASE services, which provide Zero Trust Network Access and cellular-optimized SD-WAN.

High-Performance Vehicle Connectivity

The Ericsson Cradlepoint R980 router with an Ericsson NetCloud Mobile service plan provides a ruggedized GNSS/GPS-enabled in-vehicle network solution. When coupled with the Advanced Mobile service plan, it provides threat management, web filtering, application visibility, analytics, and advanced GNSS/GPS functionality such as location tracking and cellular coverage maps. The R980 with SD-WAN provides resilient in-vehicle connections by optimizing traffic across LTE, 5G, 5G stand-alone network slices, satellite, and Wi-Fi as WAN.

Ruggedized IoT Solution

When combined with an Ericsson NetCloud Ruggedized IoT service plan, the R980 provides a versatile, ruggedized 5G router solution for connecting and protecting IoT devices at scale. It can be deployed in a wide range of environmentally harsh IoT use cases such as oil and gas, utility, and smart city infrastructure, in addition to next-gen kiosks, and video surveillance, deployments. The ruggedized design and CBRS band support make it ideal for private networks. In addition, the solution is highly extensible with APIs, SDKs, and integrations into IoT platforms, and the generous memory supports onboard edge containers.

Notable Benefits

- Gain fast, reliable connectivity with 5G NR/Cat 19 LTE providing fast upload for video and data
- Prioritize access to public safety networks for reliable, secure connectivity
- Use advanced GNSS/GPS functionality for location tracking and cellular coverage maps
- Enable zero trust security and SD-WAN with 5G SASE
- Extend your deployment and enable customized solutions with powerful edge compute capabilities, including containers, connectors, SDKs, and API support
- Take advantage of 5G network slices to segment and isolate applications or devices, prioritize traffic, and have greater control over wireless network services
- Change carriers over the air quickly and easily with built-in eSIM capability (Will be functional with future NetCloud OS releases.)

For More Information: 1-888-RUGGED-3 www.TransCOR-IT.com Sales@TransCOR-IT.com

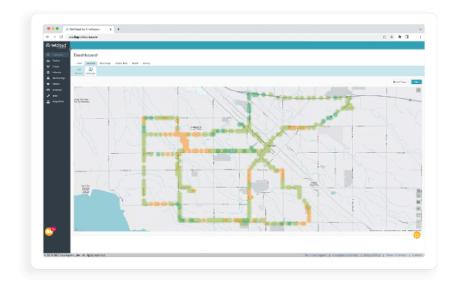

Key Software Capabilities

Ericsson NetCloud Service for the R980 provides everything needed to unlock the power of 5G and connect vehicles, users, and IoT to critical applications and services. The available Ericsson NetCloud IoT or Mobile service plans include the appropriate router software with powerful cloud management features for managing IoT at scale or specific mobile features like coverage maps, integrated content filtering, intrusion detection and protection, analytics and networking. Everything within Ericsson NetCloud works together, making it easy to deploy, connect, and secure edge applications at scale across the organization.

Coverage Map

Ericsson NetCloud uses GNSS/GPS and cellular health to provide precise location and signal strength analytics. Data can be mapped to display both a vehicle's current and historical locations, as well as generate detailed coverage maps that display cellular health, allowing users to gain operational insights and solve problems.

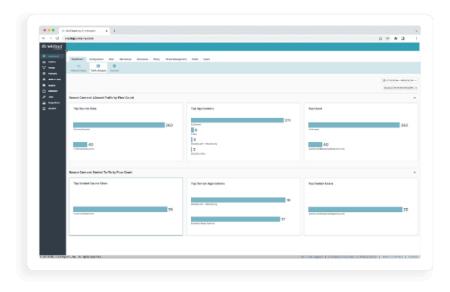

Security Services

Ericsson NetCloud Service includes security features and options to optimize the R980 router to meet the evolving security needs of mobile and IoT environments. The service includes a stateful zone-based firewall with the ability to add an application-aware zone-based firewall, threat management (IPS/IDS), and web filtering with the Advanced Mobile Service plan.

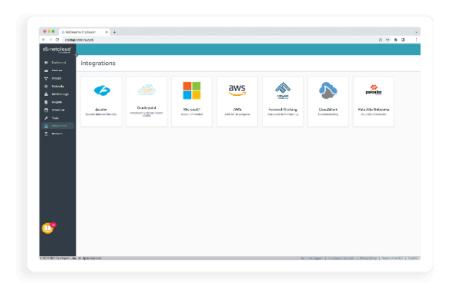

The R980 supports NetCloud SASE and NetCloud Exchange, a unified network and security WAN architecture built upon zero-trust principles and optimized for cellular, helping lean IT organizations simplify deployment and management with shared policies and simplified processes. With NetCloud zero trust security networking, delivered through Secure Connect, other devices simply connect to the router with encrypted tunnels to build microsegmented networks that are instantly hidden from internal and external sites. Access policies are easily defined to enable routing devices to communicate only with their authorized resources or applications and nothing else. The simple and secure zero trust access, delivered through Zero Trust Network Access, also delivers authorized contractors and third parties secure remote access to IoT devices on the WAN for remote monitoring and maintenance.

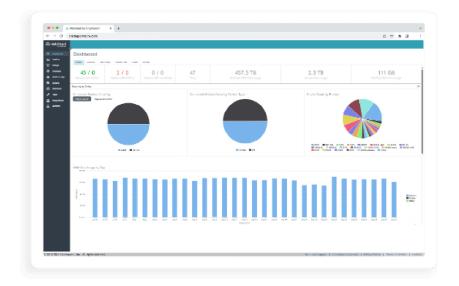

Extensibility and Integrations

Ericsson NetCloud Service and the R980 can provide higher levels of insights and control by exchanging network data with third-party applications. Leverage pre-built connections to partner applications or create custom connections across a variety of use cases using the NetCloud Container Orchestrator, NetCloud SDK, or NetCloud API.

Cloud, Routing, and SD-WAN Services

The Ericsson NetCloud Service plus R980 provides local processing power to handle routing, and traffic steering. Optional add-on includes 5G SASE and SD-WAN which delivers cellular-optimized traffic, traffic steering, and quality of experience. A single policy engine integrates policies for Secure Connect, SD-WAN, and Zero Trust Network Access for a truly unified visibility and management experience.

Hardware Specifications

The following features are delivered through the hardware.

INTERFACES	
Modem:	Embedded 5G NR FR1 and 4G LTE modem
	 4 x SMA cellular antenna connectors
	— 2 x 4FF SIM slots
	— 1 x MFF2 eSIM hardware
Ethernet:	2 x GbE RJ45 (LAN/WAN switchable)
Wi-Fi:	Dual-radio, dual-band, concurrent operation (2.4 GHz and 5 GHz)
	2x2 MU-MIMO 802.11ax Wi-Fi 6 with DFS
	 Modes: AP, Wireless Client, and Wi-Fi as WAN
	 574 Mbps (2.4 GHz) and 1.2 Gbps (5 GHz)
	 2 x RP-SMA Wi-Fi antenna connectors[†]
	 Global Optimized Wi-Fi and International SDR
	 WPA/WPA2/WPA3 Personal, WPA2/WPA3 Enterprise, Open
	— 802.11k, 802.11v
	Wi-Fi Alliance Certified
Bluetooth:	N/A
Expansion:	 1 x USB 2.0 Type A (Output: 5 V, 500 mA, 2.5 W) with screw lock feature for mechanically secure connections
GNSS / GPS:	1 x SMA GNSS antenna connector
GNSS / GPS	

Acquisition:	30 seconds (cold start)
(Time to First Fix)	
Protocols:	— NMEA 0183
	— TAIP
Constellations:	— GPS
	— Galileo
	GLONASS
	BeiDou (concurrent reception)
Accuracy:	Autonomous 1 meter
Update Rate:	1 Hz (once per second)
Sensitivity:	 Acquisition: -148 dBm
Sensitivity.	— Tracking: -161 dBm
	Cold start: -146 dBm
	— Cold Start. 140 abiii
Frequencies:	L1
Power:	Voltage Supply: 2.9-3.15 VDC
	— Max Current: 100 mA
ENVIRONMENTAL	
Temperature:	 Operating: -30 °C to 70 °C (-22 °F to 158 °F)††
	 Storage: -40 °C to 85 °C (-40 °F to 185 °F)
Humidity:	 Operating: 10% to 95%
	— Storage: 5% to 95%
Ingress Protection:	IP64 (dust tight and splashing water)
POWER	
Required:	DC input steady state voltage range: 9—36 VDC (requires in-line fuse for vehicle installations)
	 For 9–24 VDC installations, use a 3 A fuse
	 For > 24 VDC installations, use a 2 A fuse
	 Connector type: 4-pin 2x2 Molex micro-fit
	For light rail applications: 24 VDC nominal
Features:	 ISO 7637-2 reverse polarity and transient voltage protection
	 Ignition sensing (automatic ON and time-delay OFF)
Consumption:	— Sleep: 15 mW
	— Idle: 8 W
	— Typical: 11 W
	— Heavy: 13 W

^{*}NOTE: All antenna interfaces require cabled out external antennas and are not compatible with direct-attached antennas.

Enterprise-Class Modem Specifications

SPECIFICATION R980-5GD

 $^{^{\}dagger\dagger}$ Wi-Fi and cellular performance may degrade when operating above 70 $^{\circ}$ C.

^{†††}Performance testing conducted based on requirements as defined in RFC2544 using fixed-frame 1518-byte packets. Throughput results reflect uni-directional UDP traffic with less than 1% packet loss as tested with wired connections. Results do not reflect performance of the cellular wireless operator networks.

Physical Measurements & Features

Features

^{††}Cellular carriers and operators throughout the world may only require telecom industry certifications, like PTCRB or GCF, to operate on their network. Some carriers require additional testing and approval, beyond telecom certifications. A carrier listed in the approvals section means Cradlepoint completed additional testing and acquired technical approval for that given carrier. Any carrier not listed may not require additional testing or approval beyond telecom industry certifications to operate on their network.

SIM Card Info

Ordering Guide

Ericsson NetCloud Mobile and Ericsson NetCloud Ruggedized IoT Essentials packages and plans contain all the features and capabilities required for a broad range of mobile, in-vehicle, and IoT applications. Essentials packages include 24x7 support (phone support: 24-hour weekdays with emergency response on weekends, web: 24x7, chat: 24x5) and a limited lifetime warranty.

For additional capabilities, an **Ericsson NetCloud Mobile Advanced Plan** or **Ericsson NetCloud Ruggedized IoT Advanced Plan** can be added to the Ericsson NetCloud Mobile or Ruggedized IoT Essentials package at any time.

See additional details of what is included in the Essential and Advanced Ericsson NetCloud software: cradlepoint.com/netcloud-service

Support & Warranty

The R980 mobile router is only sold as a component of Ericsson NetCloud Mobile/Ericsson NetCloud Ruggedized IoT Essentials or Essentials and Advanced packages.

- Ericsson NetCloud packages include support for the full subscription term.
- All Ericsson Cradlepoint hardware products are covered by a limited lifetime warranty for as long as they have a subscription license to an active Ericsson NetCloud Service plan.
