

# WIRELESS GO-KIT WITH OPTIONAL SATELLITE

## Portable Satellite & Cellular Connectivity Solution

The TransCOR Wireless Go Kit is a fully integrated, rapid-deployment connectivity solution designed for remote, temporary, and mission-critical operations. Built around the rugged Parsec Pitbull™ Portable Case Antenna, the Wireless Go Kit combines enterprise-grade cellular routing, optional Starlink Mini satellite connectivity, and onboard battery power to deliver reliable communications wherever traditional networks are unavailable.

### Core Components

- Parsec Pitbull™ Portable Case Antenna
- Enterprise-grade cellular router (deployment-specific configuration)
- Starlink Mini satellite antenna
- Integrated battery system with AC power

### Key Features & Capabilities

- Starlink Mini compatible
- 5G cellular connectivity
- 8x8 MIMO cellular (two 4x4 MIMO antenna sets)
- 4x4 MIMO Wi-Fi
- Optional GPS
- Simultaneous satellite and cellular operation
- Omni-directional antenna design
- IP67-rated rugged enclosure
- Customizable I/O ports including RJ45
- Dedicated Starlink Mini mount integrated into case lid

### Power & Runtime

- Integrated battery pack providing approximately 2–8 hours of runtime, depending on configuration and usage
- Supports battery, AC power, or hybrid operation

### Applications

- Emergency & disaster response
- Public safety & first responder communications
- Enterprise network failover
- Remote monitoring & security systems
- Temporary job sites, events, and field deployment

# WIRELESS GO-KIT

## Portable 5G Connectivity Solution

The TransCOR Wireless Go Kit – Cellular Only is a compact, high-performance portable connectivity solution designed for rapid deployment in mobile, temporary, and field-based environments. Built around the Parsec Boxer™ Case Antenna developed in collaboration with a wireless router, this solution delivers enterprise-class 5G connectivity in a lightweight, travel-ready form factor without the need for satellite infrastructure.

### Core Components

- Parsec Boxer™ Case Antenna
- Enterprise-grade cellular router (deployment-specific configuration)
- Shock-absorbing, impact-resistant enclosure
- Integrated battery system with AC Power

### Key Features & Capabilities

- High-performance 5G cellular connectivity
- Compact, lightweight, carry-on-friendly design
- Protective case extends router life and performance
- Shock absorption and impact-resistant resin construction
- Rapid plug-and-play deployment
- No satellite equipment required

### Power & Runtime

- Integrated battery pack providing approximately 2–8 hours of runtime, depending on configuration and usage
- Supports battery, AC power, or hybrid operation

### Applications

- Mobile workforce connectivity
- Temporary job sites and pop-up operations
- Enterprise and SMB mobile networking
- Events, trade shows, and remote offices
- Field service and on-the-go deployments

### Benefits

- Affordable, high-performance 5G connectivity
- Lightweight, portable design for easy transport
- Protects and enhances mobile router performance
- Simple deployment without satellite infrastructure
